Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Drawings***

This application has been filed with informal drawings, which are acceptable for examination purposes only. Figures 3, 9-15, 17-20, 24, 27, and 30-32 contain improper shading, which may affect clarity when reproduced.

Applicant is required to submit a formal correction of the noted defect. Applicant is required to submit drawing corrections promptly. Drawing objections may no longer be held in abeyance.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 101

Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts"

Art Unit: 3625

(i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claim 1 only recites an abstract idea. The recited steps of accepting items to be sold; generating data regarding the items; formulating listings for the items; transmitting the listings; receiving notifications of sale; and receiving payments from the buyers to sell an item does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of how to sell an item.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, the claimed invention accepts items to be sold and transmit the listing to a marketplace used in selling an item.

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claim 1 is deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3625

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,845,265 to Woolston. Regarding claims 1-4, Woolston discloses a selling service (see at least col. 1, lines 39-41) that comprises:

- accepting items to be sold from sellers at one or more inlets (see at least col. 2, lines 41-46; col. 3, lines 42-56);
- generating data regarding the items by evaluating the items and photographing the items (see at least col. 3, line 42 - col. 4, line 2; col. 4, lines 12-37);
- formulating listings for the items by preparing text and combining the text with results of the evaluations and photographs, which listings include one or more sales criteria (see at least col. 3, lines 10-23; col. 3, lines 42-col. 4, line 2; col. 4, lines 12-37);
- transmitting the listings to a marketplace (see at least col. 3, line 66 – col. 4, line 9);
- receiving notifications of sales, including buyers' identities (see at least col. 3, lines 25-33; col. 5, lines 5-8);
- receiving payments from the buyers (see at least col. 5, lines 5-8; col. 5, lines 15-18); and
- sending item purchased to the buyers (see at least col. 3, lines 25-30; col. 5, lines 36-45).

Art Unit: 3625

Regarding claims 2-4, Woolston discloses generating data includes entering results of the evaluations and the photograph into a database (see at least col. 3, lines 10-23; col. 3, lines 42-col. 4, line 2; col. 4, lines 12-37; col. 14, line 64-col. 15, line 3); and Internet (see at least col. 7, lines 56-67) .

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 4,799,156 to Shavit et al. discloses a system for interactive on-line electronic communications and processing of business transaction between a plurality of different types of independent users.

U.S. Patent No. 6,108,639 to Walker et al. discloses a system for processing the sales of collectibles, and other used or secondary market goods to buyers who have submitted a purchase offer for the purchase of such goods.

U.S. Patent No. 6,732,161 to Hess et al. discloses a method and apparatus for information presentation and management in an online trading environment.

U.S. Patent Application Publication No. 2001/0034694 to Elias discloses an online system for a collectibles marketplace.
